

DANG LY PHUONG THAO

BUSINESS ANALYST

HCMC, Vietnam | dly77915@gmail.com | [LinkedIn](#) | [Portfolio](#)

Business Analyst skilled at bridging system architecture and user experience to optimize digital products. Skilled in requirement analysis and process modeling, with a strong ability to align system architecture with user experience. Proactive, fast learner, and eager to contribute to delivering optimized digital products.

EDUCATION

University of Economics Ho Chi Minh City (UEH)

Aug 2023 - March 2027

Major in Enterprise Resource Planning

GPA: 3.3/4.0

PROFESSIONAL EXPERIENCE

KOCMATE | App Operations & Marketing Intern

Jun 2025 - Sep 2025

- **Elicited requirements** directly from clients regarding campaign objectives and analyzed app user behavior to propose UI/UX restructuring, successfully optimizing the customer journey.
- **Standardized display content** for 25% of initial products, ensuring strict visual and informational consistency aligned with the platform's UI/UX standards.
- **Acted as a bridge** between clients and internal cross-functional teams (Social, Product), translating business needs and user insights into streamlined workflows and operational requirements.

PROJECT EXPERIENCE

Odoo ERP Customization & Process Automation | HT Beauty Clinic

Apr 2026 - Jun 2026

Project Manager & Business Analyst | [Project Details](#)

- **Conducted business requirement elicitation** and feasibility analysis, successfully identifying and addressing 46 operational gaps in the clinic's workflow.
- **Designed and optimized automated workflows** for customer care, significantly improving conversion rates and minimizing customer no-shows.
- **Developed process solutions** to effectively resolve resource conflicts and double-booking issues, optimizing operational capacity.
- **Built structured internal reporting frameworks** covering CRM, Appointments, and Treatments to support management tracking.

F&B Digital Ordering Solution Prototype | Tra Anh Beverage

Sep 2025 - Dec 2025

Business Analyst | [Project Details](#)

- **Elicited business requirements and modeled AS-IS processes** using BPMN to resolve peak-hour bottlenecks caused by manual ordering, thereby proposing the "Order & Pick-up" mobile app solution.
- **Designed comprehensive user flows** using Draw.io, optimizing the customer journey from menu selection and detailed beverage customization to the payment gateway.
- **Created visual prototype** on Figma to ensure technical feasibility and a seamless user experience.
